OBJECTIVE

Aspiring Computer Science Engineer with hands-on experience building full-stack web applications using Next.js , AI tools and modern cloud tooling, complemented by practical exposure to cybersecurity through hands-on internships in digital investigation and threat awareness. Eager to contribute strong problem-solving skills, designing, adaptability, and a continuous-learning mindset to a dynamic engineering team, with the versatility to grow across software engineering, data, and security-focused roles.

EDUCATION

M.Tech, Computer Science and Engineering Amrita Vishwa Vidyapeetham Ettimadai, Coimbatore	Expected graduation 2028
B.E, Computer Science and Engineering - 8.2 CGPA JCT College of Engineering and Technology Pichanur, Coimbatore	2022 - 2026
Higher Secondary (HSS) - 83.5% Vijayamatha Convent Higher Secondary School Ambatpalayam, Chittur	2020 - 2022
SSLC - 78% St. Francis Central School Kozhinjampara, Palakkad	2019 - 2020

PROJECTS

Expense-Tracker | Next.js, TypeScript, Tailwind CSS, Recharts

- Designed and built a responsive fintech dashboard for expense tracking, implementing complex UI patterns, interactive charts, and a seamless cross-device user experience.
- Utilized the Next.js App Router for optimized serverside rendering and routing, and implemented interactive data visualization with Recharts to track spending habits.

Trust-Chain Escrow - Dual-Key Verification System (Final Year Project) | Next.js, TypeScript, Tailwind CSS, Framer Motion

- Architected a dual portal B2B dashboard using Next.js 14 (App Router) and TypeScript, reducing initial page load times by 30% through server-side rendering (SSR) and dynamic imports.
 - Implemented secure transaction flows by generating 30day expiry JWT transaction tokens and automated verification checks during the escrow payment process.
 - Optimized client-side asset delivery and form layout structures using Tailwind CSS and Framer Motion, decreasing page transition latency by 25%.
-

TECHNICAL EXPERTISE

Programming Languages: Python, Java, JavaScript, HTML, CSS
Databases: MongoDB, Supabase
Tools: Git, GitHub, REST APIs, VS Code, Cursor, Gemini, Antigravity, ChatGPT, Codex
Security: Cybersecurity Fundamentals, Network Security

Frameworks: Next.js, Tailwind CSS
Cloud & Deployment: Vercel
Databases: Supabase

INTERNSHIPS

Cyber Security Internship - The Commissioner of Police | Coimbatore (March - April 2026)

- Completed an in-person internship focused on the role of cybersecurity in modern policing, gaining exposure to real time investigation procedures, legal frameworks, and digital evidence handling.
- Observed cyber-related complaint handling and FIR/CSR registration procedures, and learned the role of telecom data and digital evidence in criminal investigations.

Python Programming Internship - CodSoft (Aug - Sep 2025)

- Completed a virtual internship building practical Python projects, including a To-Do List application, a Password Generator, and a Basic Arithmetic Calculator.
 - Strengthened problem-solving and coding skills by applying core Python concepts to real-world tasks, improving efficiency, functionality, and user interaction.
-
